

COVID Vaccinations Fall in with National Immunization Awareness Month

We all need vaccinations to help protect us from the new variants of COVID-19, as well as, other serious diseases. This protection is called immunization. To help keep our community safe, San Joaquin County Clinics proudly participates in National Immunization Awareness Month. Vaccinations for COVID can prevent the spread of the disease. Immunizations are also needed to prevent serious diseases like the flu, measles, and pneumonia. It's important to know which shots you need and when to get them. Keep a copy of your immunization/shot record. If you have children, make sure you keep a copy of their record and keep their immunizations up-to-date. California Schools and Day Care Centers require their students to have up-to-date immunizations in order to enroll.

IMMUNIZATIONS are available to you and your family at any of our clinics. Make an appointment now by calling SJCC at (209) 468-6820.

More immunization information at <https://www.cdc.gov/vaccines/vpd/vaccines-age.html>

Get a COVID-19 Vaccine as Soon as You Can!

August 8TH-14TH National Health Center Week

National Health Center Week is an annual celebration with the goal of raising awareness about the mission and accomplishments of America's health centers over the past five decades. San Joaquin County Clinics are proud to be amongst these health centers who provide excellent medical care for our patients and their families.

This National Health Center Week also honors those front line providers, staff, and beloved patients who lost their lives during the (ongoing) COVID-19 pandemic. From the very beginning of the crisis, San Joaquin County Clinics began finding innovative ways to provide preventative and primary care to their patients. ***We're Here for You!***
