

San Joaquin General Hospital and San Joaquin County Clinics want to thank the community for coming together and ensuring the safety of our neighbors and health care workers.

We have increased our COVID-19 testing capabilities and have special programs for COVID-19 positive patients. We can ensure the availability of personal protective equipment and have introduced new safety precautions to minimize the risk of COVID-19 transmission. Our physicians, nurses and staff are screened for COVID-19 prior to interacting with patients or conducting procedures.

Over the past couple months we have seen a significant climb in COVID-19 cases at our hospital. However, at San Joaquin General Hospital and San Joaquin County Clinics are still performing elective procedures, clinic visits and other patient operations with special attention to all COVID-19 safety measures. Across our organization, we have taken every precaution to make your health our highest priority and to continue to provide the highest standards of patient safety and quality care.

When you call or are contacted by Call Center Agents, Clinic Staff, or Referral Coordinators about an appointment you will be asked a series of questions concerning symptoms you may be experiencing and recent travel history. You will also receive instructions about our updated clinic and visitor protocols.

When you visit, you will notice:

- Carefully monitored entrance points
- All patients and visitors are being screened for symptoms and possible COVID-19 exposure before entering the building
- Universal masks are required for all patients, visitors, and staff
- Waiting areas are rearranged for social distancing
- Frequent cleaning of exam rooms and waiting areas

Your safety and your confidence that when you need care, there is no better or safer place to be remains our top priority. We are ready to see you and are here for you always, whenever you need us.
